CAREER SUMMARY

Java Backend Software Engineer with 5 years of professional experience in enterprise software development, specialising in Java, Spring Boot, Apache Kafka, REST APIs, and Microservices architecture. Experienced in delivering banking and fintech systems for clients across Australia, the Middle East, and West Africa, including payment processing, core banking, API integrations, production support, and international go-live delivery.

PROFESSIONAL EXPERIENCE

Software Engineer I — Sibisoft Pvt. Ltd.

Feb 2024 – Present | Karachi, Pakistan | FinTech / Payment Processing

- Developed and deployed end-to-end POS payment flows using Java and Spring Boot for Ezidebit Omni devices, supporting refunds, partial payments, voids, and tip adjustments for Australian clients.
- Implemented Apache Kafka event-driven microservices to decouple payment events from downstream processing, improving resilience and auditability.
- Applied Spring @Transactional and Hibernate/JPA to maintain ACID-compliant payment workflows; delivered JUnit, Mockito, and Cypress testing and supported UAT/production releases.
- Investigated production issues across payment processing, POS, card transactions, hosted payment pages, AR and settlement workflows using SQL, logs, transaction records, and code-level debugging.

Technical Consultant — Systems Limited

Mar 2023 – Feb 2024 | Karachi, Pakistan | Banking Technology / Core Banking

- Built Java/Spring Boot backend services for UBL Customer Onboarding and Silk Bank Mobile Application, taking both systems through production go-live.
- Developed Bill Payments, Fund Transfers, Account Statements, and RAAST real-time payment integration using REST APIs; integrated enterprise banking services.
- Optimised MySQL stored procedures and complex SQL queries for high-transaction banking workloads and resolved 200+ production incidents under tight SLAs.
- Contributed to banking application rollouts in Senegal and Iraq and received the Rising & Shining Star Award for delivery under pressure.

Associate Software Engineer — Systems Limited

Aug 2021 – Mar 2023 | Karachi, Pakistan | Retail Banking / Core Banking APIs

- Developed Java/Spring Boot backend modules for retail banking mobile applications and back-office systems.
- Integrated RAAST real-time payment APIs and T24 core banking APIs for interbank transfers, account queries, transaction history, and transaction processing.
- Participated across the full SDLC including requirements, development, testing, deployment, and production support in an agile enterprise environment.

EDUCATION & QUALIFICATIONS

Master of Software Engineering — FAST National University, Karachi | Aug 2024 – March 2026

Thesis: Federated Learning for Privacy-Preserving Fraud Detection in Financial Systems

Bachelor of Software Engineering — Mohammad Ali Jinnah University, Karachi | 2017 – 2021

Equivalent to NZ Level 7 qualification — satisfies AEWV degree requirement for ANZSCO 261312.

CERTIFICATIONS

- Building Microservices with Spring Boot — Udemy
- Master Java Web Services & REST APIs — Udemy
- AWS Solutions Architect Associate — In Progress

TECHNICAL SKILLS

Backend: Java 17+, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, REST APIs

Architecture: Microservices, Event-Driven Architecture, Distributed Systems, Transaction Management

Messaging: Apache Kafka, RabbitMQ

Databases: MySQL, PostgreSQL, SQL, Stored Procedures, Query Optimization

Testing: JUnit, Mockito, Cypress

DevOps: Git, Maven, Docker (labs), CI/CD

Domain: FinTech, Banking, Payment Systems, POS, API Integration.

RESEARCH PAPER

- MS Thesis: “Federated Learning for Fraud Detection in Credit Card Transaction using Edge Computing” — FAST National University, May 2026.
- Designed and evaluated a privacy-preserving Federated Learning + Edge Computing framework using 5 non-IID clients, FedAvg/FedProx, XGBoost, and class-balancing techniques (SMOTE/ADASYN); assessed fraud-detection performance, communication cost, and edge latency.

KEY ACHIEVEMENTS

- Deployed Ezidebit Omni POS and hosted payment solution for Australian clients.
- Production go-live: UBL Customer Onboarding and Silk Bank Mobile.
- Banking deployments in Senegal and Iraq.
- Rising & Shining Star Award — 200+ incidents resolved under SLA.
